

**INTERPRETATIONS & APPLICATIONS  
OF BUILDING CODES & REGULATIONS #88-5**

**CODE SECTION :                    IBC   1507.3**

**5/6/96**

**SUBJECT :    ROOF TILES**

All clay or concrete tiles that have not been evaluated and a National Evaluation Report (NER) issued, shall not be considered to be an effective weather-proof material, as required by Chapter 15 of the International Building Code (IBC).

All non-approved clay or concrete tiles shall be placed over an approved roof covering as prescribed in IBC Chapter 15.

Attachment of non-approved clay or concrete tiles shall conform to IBC Table 1507.3.7, or methods approved by NER Evaluation Service. Nails or other fastener heads shall be covered by mastic.
